

Assessment Course Tracker for Virtual Classrooms in Adobe Connect

Name	Score	Time
Jacque Beck	3600	00:01:07
Donna Lewis	3100	00:02:16
Geraldine Levet	3000	00:02:46
Angela Peterson	2600	00:02:30
Jen Flynn	2500	00:01:35
Tinamarie Rasmu	2500	00:02:45
Gary Landrum	2400	00:01:48

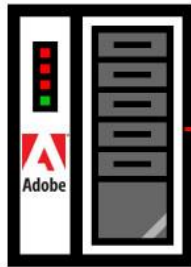

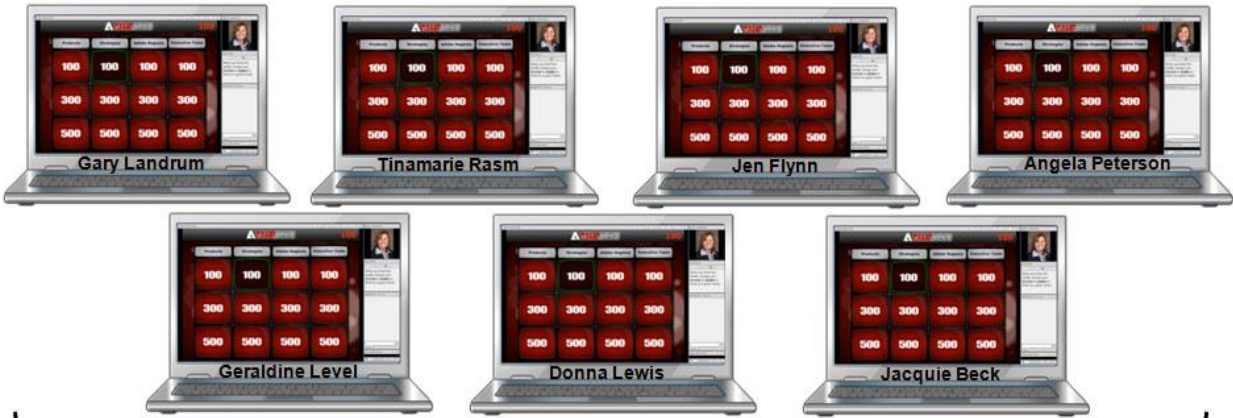

Brookwood has a custom pod that will track training courses that are loaded into a virtual classroom via Adobe Connect. Our custom pod will call out to the Connect server to access the report on **COURSES>BY USER** and pull that tracking data right into your virtual classroom to show you test scores in real-time so you never have to leave the classroom to run a manual report off the the Connect server. This will streamline gaming assessments so you can call out winners seconds after completion and distribute incentive prizes or call out names of people who demonstrate mastery of content.

Brookwood Games are a great way to assess learners to keep your virtual events fun, engaging and interactive. Our library of games can be programmed and tracked in Adobe Connect Virtual Classrooms. Every game can be tracked via Connect Reports and branded to your company with your content. These games can support any type of learning material and contain; multiple choice, multiple answer and true/false interactions. Our games also include sound and narration to enhance the assessments with professional narration and feedback. Students will love gaming in your virtual events!

Call or email Jacquie Beck for more information on Virtual Gaming Assessments with the Assessment Tracker Pod.
jbeck@brookwood.com | 215-717-2784 | <http://www.brookwood.com/assessment-virtual-learning-games>

Your learners can take assessments during your virtual training event simultaneously and you get updates on each learner in real time to track high scorers and game winners

Our Pod: pulls data off Connect server in real-time to provide scores instantly for facilitators.

Displays: time in game & score.
